

Greenhorn Mountain Resort Proposal

Dylan Harwell | GIS-4740

The Area and Why

- Greenhorn Mountain – Wet Mountains – Sangre De Cristo Range
- Just outside Rye and Colorado City in Southern Colorado
- Closest ski resorts: Monarch (112 Miles), Taos Ski Valley (160 Miles), Wolf Creek (167 Miles)
- Potential for visitors from all over Northern NM and Southern CO

Scope: Starting Large

- MODIS Imagery from March 8, 2016 covering the Western half of the US
- Red coloration shows mountain snowpack
- Wet Mountain Range in yellow box

Bands 1-4-3 (true color)

Bands 3-6-7

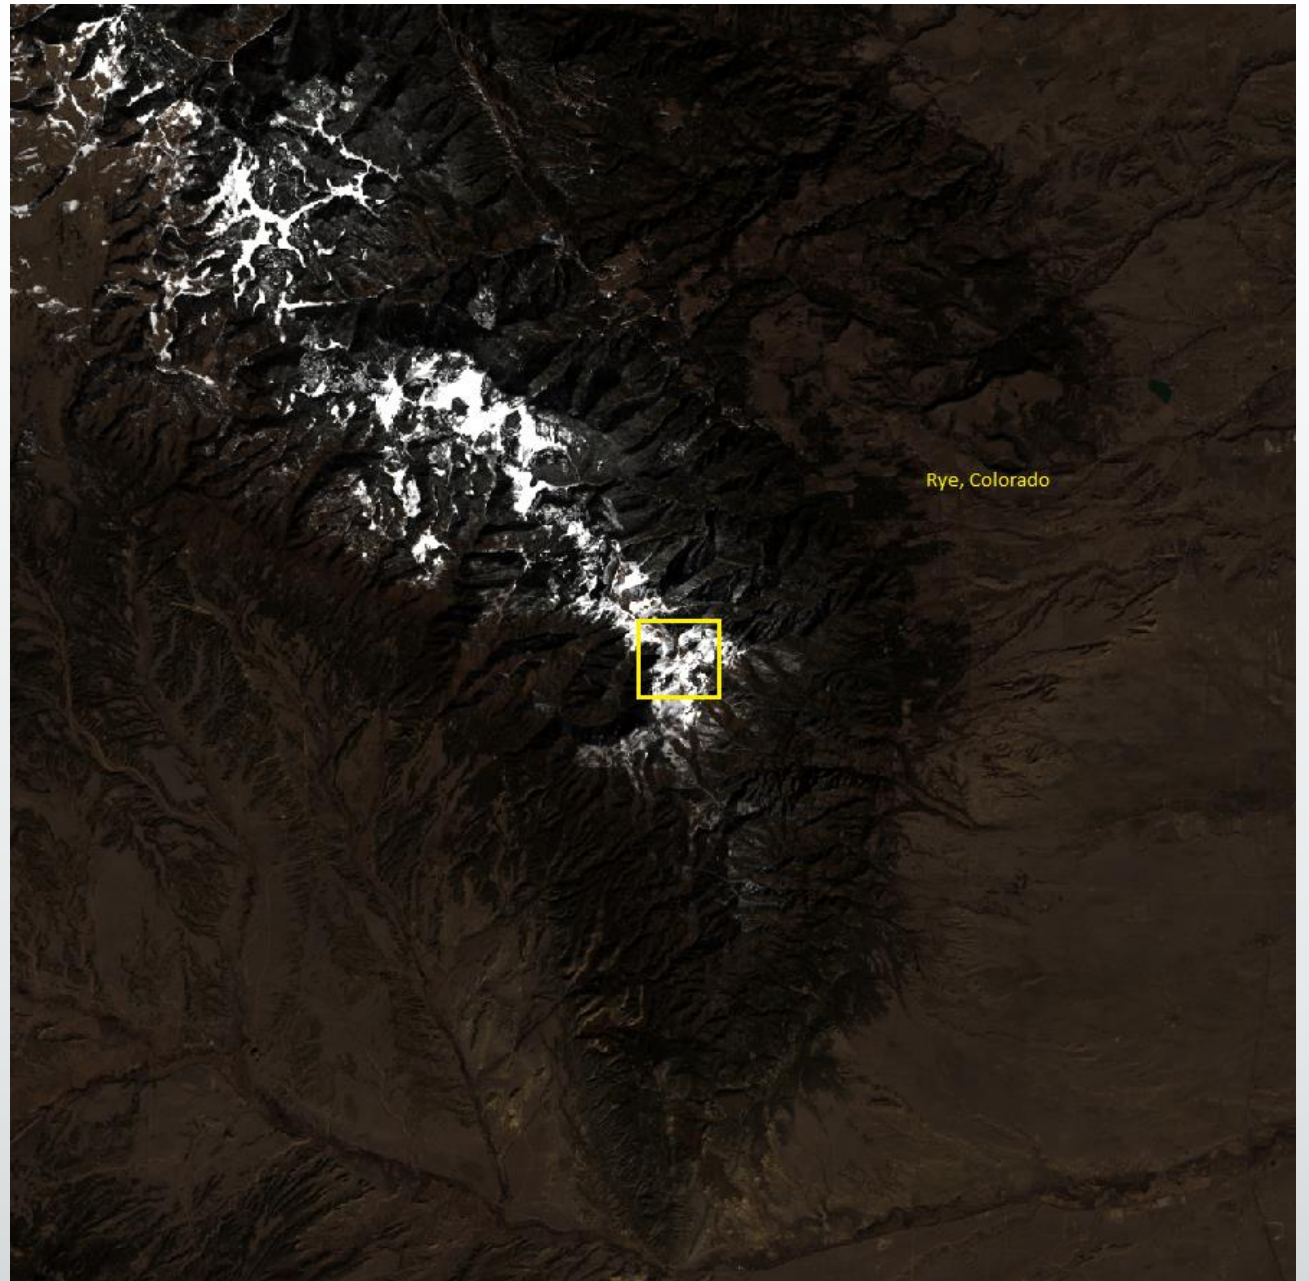

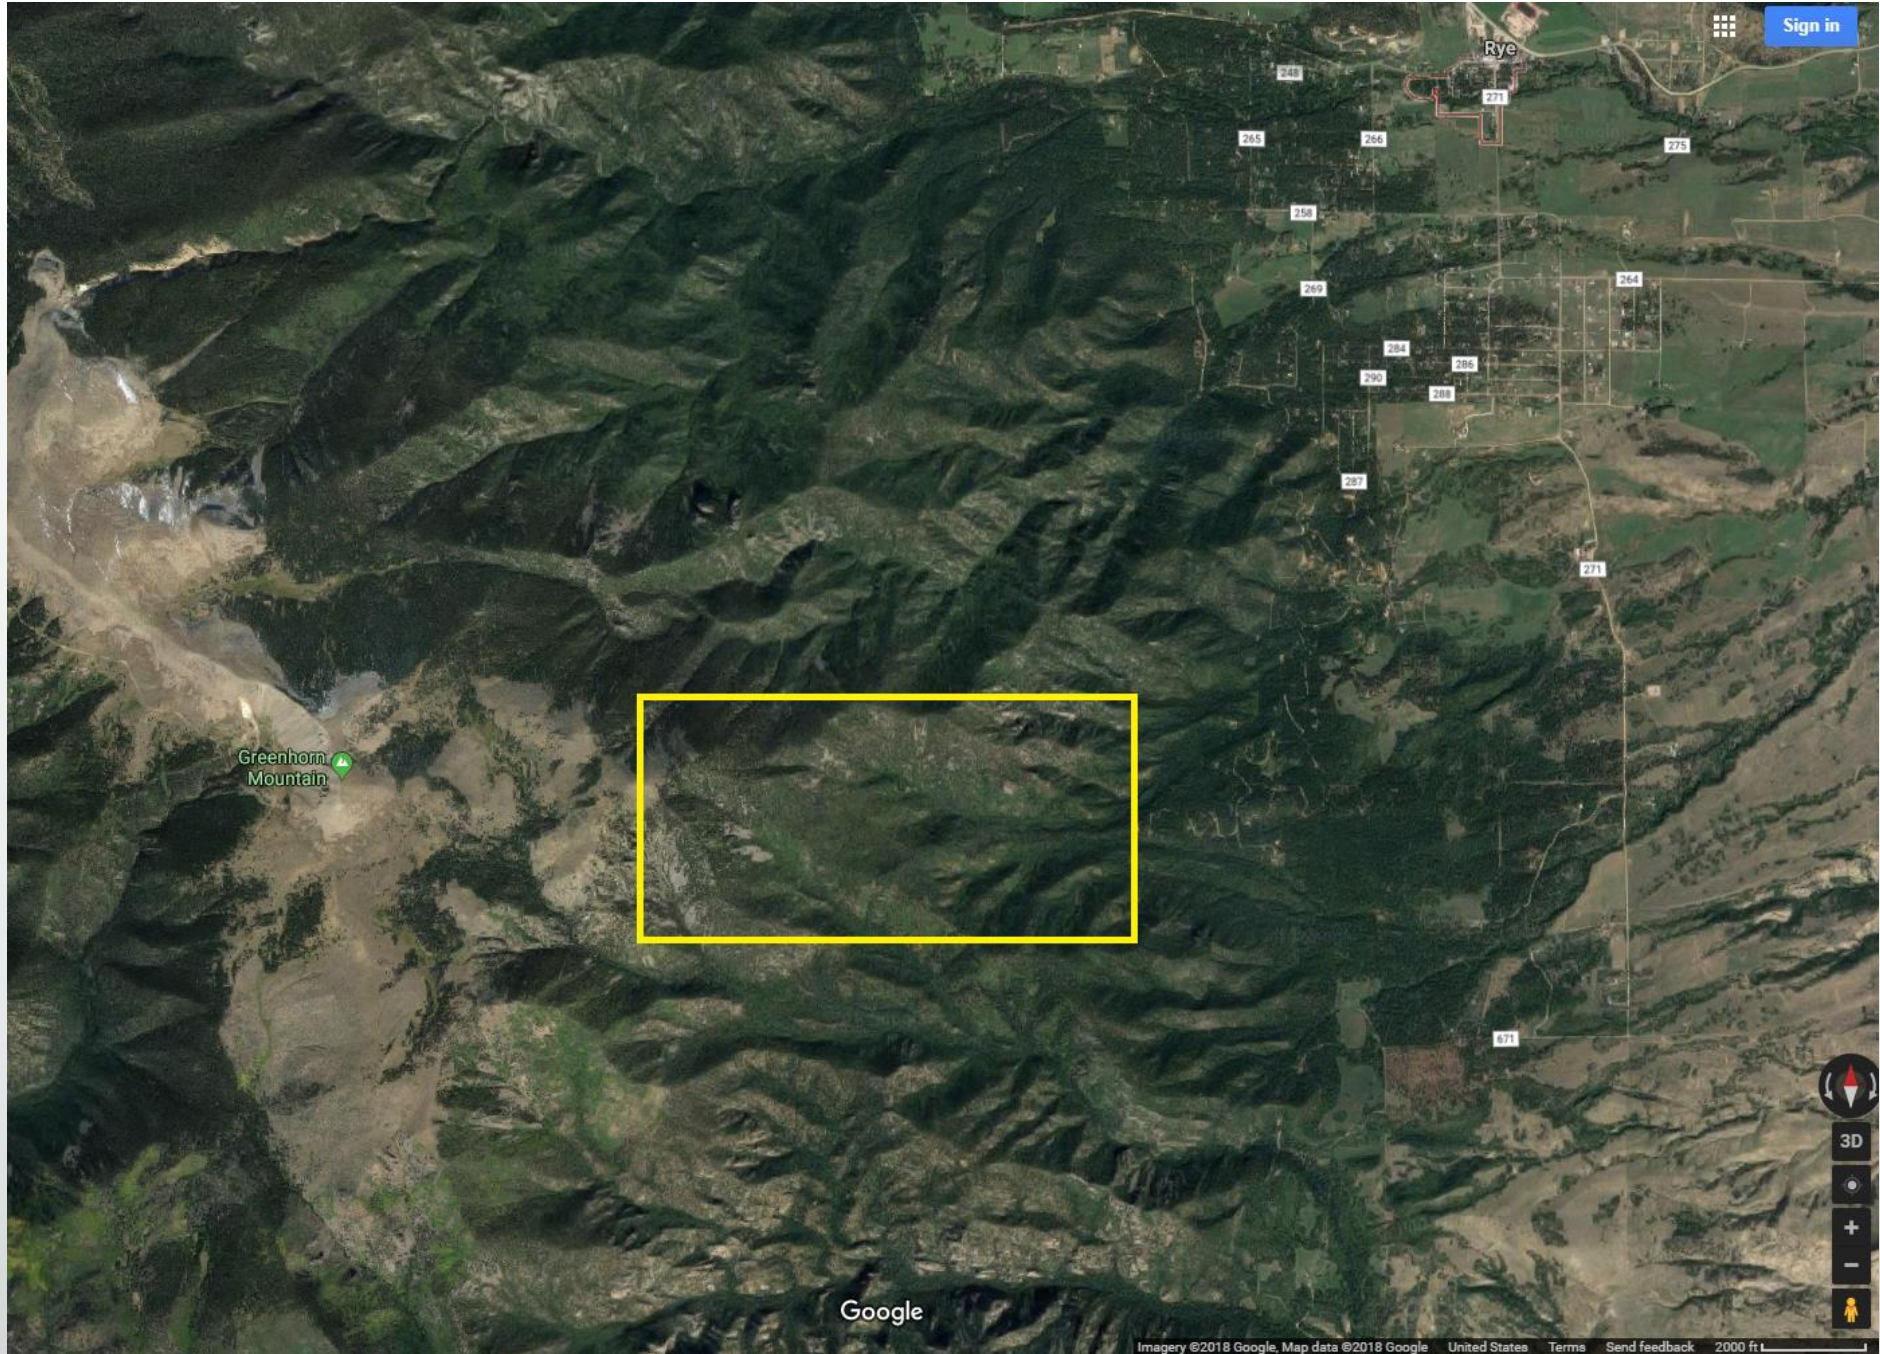

Bands 7-2-1

Scope: Narrowing In

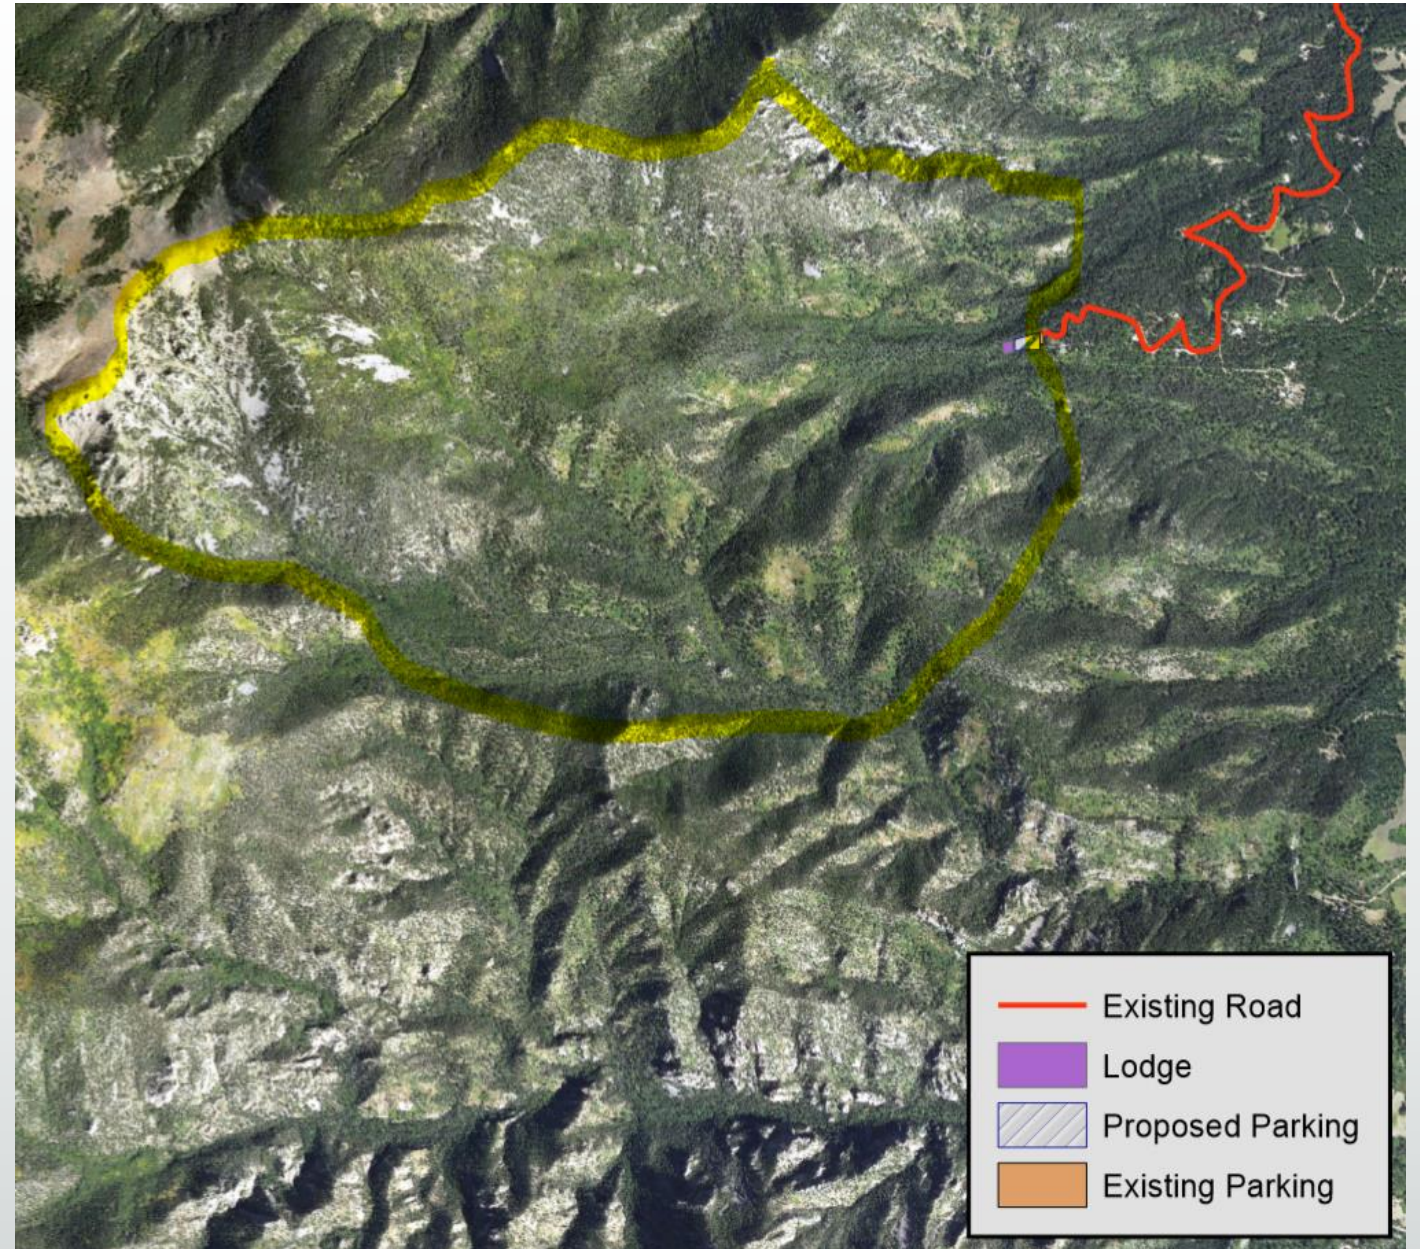

- Landsat 8 Imagery from March 10, 2016 of the Wet Mountains
- Image in true color
- Yellow Box: Greenhorn Mountain (elevation 12,352 ft.)

Potential Ski Area Boundary

- Existing Road: Barlett Trail Rd
- Has small parking area already
- Potential for expanded parking, lodging, amenities
- *Note: Greenhorn Mtn has an existing road almost to its summit on the West side, but is not practical to access from any major cities.

Ski Area Map

- Potential Boundary in yellow
- Practical lift locations
- Wide range of easy to moderate to expert terrain
